Slide the G-clamp into the slot in the side of the holder, then slide the lamp assembly spigot into the holder.

Plug the power adaptor into a mains power supply and connect the adaptor to the lamp unit.

SETTING UP

The G-clamp can be mounted on surfaces with varying angles and such variations can be accommodated by the angulation of the lamp assembly.

The lamp may be rotated freely in the holder and the arms set at any angle by slackening the pinch bolts, adjusting the angle and re-tightening.

DO NOT over tighten the pinch bolts. When they are correctly tightened, the lamp should be capable of maintaining stability in any position.
